MULTI-CARRIER INTEGRATION

Create shipping labels and process shipments with more than 30 domestic and international carriers, including:

- FedEx
- UPS
- US Postal Service
- Canada Post
- Purolater
- DHL
- RR Donnelley
- Royal Mail

REQUIREMENTS

Microsoft Dynamics 365 Business Central
ShipStation

Get Your Products To Your Customers

Bring the highest-rated shipping software in the world to your ERP environment, and expand your operational capabilities like never before.

bcShipStation combines the most popular ERP system in the world, Microsoft Dynamics 365 Business Central, with the number one shipping software of online sellers, ShipStation, giving you the ability manage and track your customer shipments. bcShipStation keeps your Business Central and ShipStation platforms completely in sync with each other, eliminating the need for duplicate data entry, streamlining your processes, and automating your shipment activities.

bcShipStation is developed by Beck Consulting, an organization with extensive experience in integrating multi-carrier solutions to Microsoft's Dynamics platform. What this means to you is that you can confidently deploy bcShipStation knowing that you are working with software that was developed by an organization who truly understands the needs and realities that come with shipping a large volume of packages and parcels.

Stay in Sync

At its heart, bcShipStation is a connector between Dynamics 365 Business Central and ShipStation. Orders that you receive from an online retailer or storefront into ShipStation can be transferred to Business Central as sales orders. All the key information, such as customer, items, and shipment method, will be automatically entered on the documents in your ERP platform. This brings new levels of efficiency to your business, as you no longer need to worry about entering the same order in two separate places.

Simple, Straightforward Setup

bcShipStation is designed with your independence in mind. The setup is quick, easy, and intuitive. All you need to do is configure a few straightforward setup options, link your Dynamics 365 Business Central and ShipStation records to each other, and you're up and running. Using the provided documentation and maybe a support e-mail or two, you can be completely self-sufficient in rolling bcShipStation out. This means that you can schedule your bcShipStation deployment around your day-to-day work responsibilities, not the other way around. And by setting up the application yourself, service costs are eliminated.

The screenshot displays the ShipStation interface for Order 1004, which is in 'Awaiting Shipment' status. The interface is divided into several sections:

- Order Summary:** Shows order details such as Order Date (4/24/19), Product Total (\$37.00), Shipping Paid (\$0.00), Tax Paid (\$0.00), Total Order (\$37.00), and Total Paid (\$0.00).
- Buyer / Recipient Info:** Lists the recipient as Selangorian Ltd. with a verified address at 1059 N HAWLIN AVE, CHICAGO, IL 60651-3831 US.
- Shipments:** Indicates 'No prior shipments' and provides options for Labels, Docs, Void, Return, and Resend.
- Shipping Info:** Shows shipping details including Ship from (My Default Location), Weight, Service (FedEx Standard Overnight), Package (FedEx® Box), Size, Confirm (Service Default), Insurance (None), Rate (\$62.00), and Delivery Time (Monday 4/29 by 03:00 PM).
- Order Items:** A table listing items with their Unit Price, Quantity, and Total Price.

Item	Unit \$	Qty	Total \$
Advanced Mouse SKU: 80208	\$3.20	2	\$6.40
Performance Keyboard SKU: 80212	\$15.30	2	\$30.60
- Order Notes:** Includes fields for Customer, To Buyer, Internal, and Custom Fields, with a note indicating 'This is a gift'.
- Order Activity:** A section for tracking order progress.
- Other Shipping Options:** A list of checkboxes for additional shipping preferences, such as 'Print postage on the shipping label for this order' and 'Include a return label with the outgoing shipping label'.

With bcShipStation, you can easily transmit sales order information between your Business Central and ShipStation platforms.

Enhanced Features

bcShipStation goes beyond being just a simple tool that transfers data between platforms. The application contains additional features, including:

- **Freight and Tax Accounts:** calculated freight and tax amounts in ShipStation can be added to the proper sales orders in Dynamics 365 Business Central, ensuring that these charges are recorded to the appropriate General Ledger accounts.
- **Tagging:** utilize ShipStation's tag functionality to quickly identify pending Business Central records that are awaiting activity, making it easy to batch process the desired orders.

About Us

For over 30 years, we have been providing enterprise software and professional services to clients of all types and sizes throughout the world, from startups to multibillion dollar companies. With applications based on the most modern ERP (Enterprise Resource Planning) system available today, Microsoft Dynamics 365 Business Central, our goal is to assure that our solutions reflect the way you do business.
